ADVISORY COMMERCIAL REPORT NO. 1.

Friday, January 14th, 1916.

To the Board of Education:

At a meeting of the above-named Committee, held this day, the following members being present, viz., Messrs. Bradshaw, Boland, Hodgson, Shaw, Bailey, Marriott and Stone, it was decided to recommend as follows:

1. That this Committee are of opinion and recommend that the request of Col. Osborne, contained in his letter of January 12th (see Appendix A), be granted, provided a satisfactory guarantee is entered into in form approved of by the Board's Solicitor that the building will be returned to the Board in the same condition it is now in or an allowance satisfactory to the Board be made to restore the building to its present condition and in the event of such guarantee being entered into by the Corporation of the City of Toronto, that the cost of restoring the building to its present condition be not charged against the Board of Education.

Respectfully submitted,

THOS. BRADSHAW,
Chairman of Committee.

COPY OF LETTER FROM COL. OSBORNE

(APPENDIX "A".)

Headquarters, Exhibition Camp,
Toronto, January 12th. 1916.

C. H. Bishop, Esq.,
Superintendent of Buildings,
Board of Education, City Hall, Toronto.

Dear Sir:—

By direction of the General Officer Commanding 2nd Division, I beg to ask you whether it would be possible to make available for the use of troops for three or four months the Commercial High School Building. You are, of course, aware that a great many battalions are being mobilized in Toronto and one of our great difficulties is to find suitable accommodation for them. Our idea would be to quarter one battalion of infantry, about 1,100 men, in this building. If your Committee could see its way to permitting us to use the building for the above purpose, every care would be taken that no damage would be done,

but if through any cause the building should be injured by reason of our occupation, all damage so occasioned would, of course, be made good. I need hardly add that favorable action on this request would be most highly appreciated.

I remain,

Yours faithfully,

K. C. OSBORNE,
Lieutenant-Colonel.

(No. 7.)

REPORT OF ADVISORY COMMITTEE RE CARE OF MENTAL DEFECTIVES IN TORONTO.

The Advisory Committee appointed in accordance with a suggestion made by the Provincial Secretary at a conference held between the Hon. W. J. Hanna, Provincial Secretary, and the Hon. Dr. Pyne, Minister of Education, representing the Ontario Government, and His Worship the Mayor of Toronto and the Board of Control, accompanied by a number of representative citizens of Toronto, to report on the best means of care and control for the mentally defective in Toronto, beg to report as follows:

1. Your Committee find that there are, at present not less than eighty-three mentally defective children in the following Homes for Children in Toronto:

Children's Shelter	25
Boys' Home	18
Home for Incurable Children	15
Protestant Orphans' Home	12
Girls' Home	6
Infants' Home	7
	83

There are in addition over one hundred mentally defective boys in the Victoria Industrial School and thirty mentally defective girls in the Alexandra Industrial School, the majority of whom belong to Toronto or its vicinity. Total 130.

Your Committee would draw special attention to the fact that all of these are now being maintained at the public expense, by municipal and government grants and by the money of benevolent citizens. The authorities of these Institutions are the leaders in this movement, asking for proper training and permanent care of the feeble-minded as a measure of economy and wise administration.

In addition to the above Commissioner Boyd states that in 1914, eighty-four children were referred by him to the Clinic at the Toronto General Hospital. Out of this number 1 was an idiot, 16 were borderline cases, 7 were backward, 8 were very seriously backward and 16 were mentally defective. The number in 1915 is already in excess of the above.

The Commissioner has at present before him a woman 34 years of age, whose mental age is 9 years. She has a large number of children.

It is estimated by the Chief Inspector that there are not less than 250 to 300 mentally defective children now attending the Public Schools in Toronto, besides an unknown number of mentally defective children not attending any school.

The Chief Medical School Inspector, Dr. McKay, is now conducting a special inquiry into this matter.

Your Committee has considered carefully the possibility of utilizing some building, such as the old Toronto General Hospital, as a temporary refuge for our mental defectives, but are unanimously of the opinion that this is not feasible.

In one or two of the Children's Institutions mentioned some slight temporary relief has been given by the efforts of those in charge of the Summer Course for Auxiliary Class Teachers, which was conducted during July and August. This, however, only shows what can be done with mentally defective children if the right methods of care and training are employed.

In the Haven there are 52 women who are mentally defective and about 80 mental defectives in the Industrial Refuge for Women, besides three or four feeble-minded mothers in the Infants' Home, and a number of feeble-minded women varying from 15 to 20 in the Mercer Reformatory, and an equal number in the Gaol and at the Women's Industrial Farm. Total, 166.

Your Committee cannot conclude this part of the Report without drawing attention to the fact that the gravest aspect of the problem of which they have attempted a partial solution is this—Nearly all uncared-for mental defectives, both men and women, probably become parents, and this sometimes at an early age (the Committee has access to records of feeble-minded girls only fourteen years of age becoming mothers) and their offspring, illegitimate in many cases, are more numerous than the progeny of normal men and women in the ratio of 7 to 4. Permanent care in a suitable institution is the only remedy for this evil. Our duty to our neighbor as well as our duty to our country must be held to include our duty to posterity.

Your Committee now submit an outline of what they believe to be the best plan of dealing with the above situation:

1.—Classes for Backward Children in the Public Schools.

All children capable of being educated should receive the education for which they are best fitted, and those who need institutional care may be recognized in these classes and recommended for admission to a suitable institution.

2.—A Register of all Mental Defectives in Toronto.

This Register, in the opinion of the Committee, should be under the direction of the Medical Officer of Health of Toronto.

3.—A Psycho-Educational Clinic where Medical Investigation, Diagnosis, Assistance and Advice may be available for all Persons Referred to the Clinic.

The Clinic should be carried on in co-operation with the School Medical Inspection Staff of Doctors and Nurses and the

Department of the Medical Officer of Health, and should be organized under one central authority. Such a Clinic is now being carried on weekly at the Toronto General Hospital under the name of "The Social Service Clinic."

4.—An Institution of the Industrial Farm Colony Type, with Buildings on the Cottage Plan.

(1) Name—The Farm School. (The Little Farm School.)

(2) Place—Within a radius of about 25 miles from Toronto.

(3 Transportation—Good railroad or radial road connection.

(4) Situation—As attractive and beautiful as can be obtained.

(5) Extent—Three hundred acres as a minimum. About one acre for each inmate has been found advisable in the oldest and most successful institutions of this kind.

(6) Buildings—These should be simple, inexpensive, fireproof if possible, and constructed in a modern and economical way on the cottage plan.

The cost is estimated by your Committee at from $25,000 to $50,000 for a cottage for 50 inmates.

The buildings bought with the farm should be utilized at first for the "cottages" of the institutions.

The general plan or lay-out of the institution buildings should be decided upon by competent authority before any building is begun.

The Waverley (Mass.) "unit" of a cottage containing 105 inmates with rooms of about 30 x 40 feet seems to be a good one.

(7) Maintenance—The following figures, showing the annual cost per inmate per year in a number of residential institutions, including in most cases food, clothing, heat, light, repairs and salaries, are submitted:

The Protestant Orphans' Home, Toronto	$87 00
The Girls' Home, Toronto	96 00
The Boys' Home, Toronto	100 00
Indiana School for the Feeble-minded	147 00
Orillia Hospital for the Feeble-minded	147 00
Kansas School for the Feeble-minded	150 00

Sandlebridge School, Manchester, England	151 00
England School for Feeble-minded Children, Liverpool	162 00
School for the Feeble-minded, Waverley, Mass	200 00
Industrial Schools of Ontario	218 00
New Jersey Training School, Vineland, N.J	294 00

Taking $150.00 as the average cost of maintenance per inmate per annum, this might be made up as follows:

(a) All boys or girls admitted from the Industrial Schools or sent from the Juvenile Court to be paid for as provided under the Industrial Schools Act. This will cost no one any more than the sum now expended for those boys and girls and every one will get better value for the same money.

(b) All pupils transferred from Public School Classes to be paid for from the funds of the Board of Education according to the rate of expenditure by the Board per pupil (average attendance) per year, e.g., $37.00 in the year 1913, or in such other manner as may be approved.

(c) An annual grant from the City Council of Toronto, as recommended by the Social Service Commission, according to the needs of the Farm School and the character of the work it is doing.

(d) Annual grants from the Ontario Government under R.S.O. Ont., Chapter 300, Section 2.

(e) Special grants from the Department of Education for Ontario as provided under the Auxiliary Classes Act, Section 13. It is found that the cost of a pupil in an Auxiliary Class is about three times the cost of a pupil in an ordinary Public School Class. It may be hoped that the grant from the Department will be in proportion, and also that the Little Farm School may be the first to apply for this grant in Ontario.

(f) It is assumed that benevolent and patriotic citizens will be inclined to contribute to the Farm School as generously as they now do to the Orphanages and the Children's Homes, where the same children are now largely supported by their contributions.

(g) Parents whose children are admitted to the Farm School and who are able to pay part or all of their maintenance are expected to do so.

(h) Superintendent, Officers and Staff—The members of the Committee cannot express and urge too strongly their unanimous conviction that the right persons must be found to establish, guide, develop and supervise the Institution and that unless this is done our best efforts will be in vain.

Residential medical supervision is necessary.

(i) Inmates—Great care must be exercised as to admission of inmates.

Both sexes must be admitted and kept separate from the beginning.

A group of say ten or twelve boys, who are somewhat skilled and trained and able to work, should be selected and placed in one of the farm houses, under the direct charge of the Superintendent, and other boys should be admitted one or two at a time.

A similar group of girls under the charge of a lady as First Assistant Superintendent, should be placed in another farm house some distance away. In this way the institution would gradually develop. Other cottages would then be added as soon as it was found advisable.

Re-examination from time to time and individual study of each inmate is essential.

The most careful and complete classification of the inmates must be made and maintained.

Provision should be made for children of all classes, both rich and poor.

The industrial and household training of the inmates must be secured.

All inmates, as far as possible, by their work and otherwise, should bear their share of the cost of maintenance.

The necessary custodial care must be provided.

(j) Board of Governors—This should be a body of public-spirited citizens, both men and women, thoroughly representative of the City of Toronto.

The method of appointment of the Board is felt by your Committee to be of great importance and they would venture to suggest the following for consideration:

Number—Three ex-officio and fifteen appointed of whom not less than five shall be women.

Term of Office—Three years, five Governors retiring each year, except in the case of those first appointed, who shall hold office, five for three years, five for two years and five for one year. Governors shall be eligible for re-appointment.

The constitution of the Board might, it is suggested, be as follows:

EX-OFFICIO.

The Provincial Secretary.
The Minister of Education.
The Provincial Treasurer.

APPOINTEES.

One by the Lieutenant-Governor in Council.
Three by His Worship the Mayor of Toronto.
Two by the Board of Education.
One by the Separate School Board.
One by the Board of the Industrial Schools.
One by the President of the Board of Trade.
Two by the Toronto Local Council of Women.
Four (two of whom shall be women) by the Charitable Institutions of the City of Toronto.

Your Committee would recommend that if a By-law is necessary, a money By-law for $200,000 should be submitted in January, 1916, to provide for the necessary civic expenditure, or rather investment, and the members of the Advisory Committee are willing, if requested by the Council to do so, to give time and thought to the work of informing the ratepayers of the reasons which make this expenditure not only advisable but economical and urgent.

SUMMARY.

THE PRESENT SITUATION.

Two hundred and thirteen mentally defective children are now supported at the public expense in Children's Homes, Orphanages and Industrial Schools in or near Toronto. These are a heavy burden to the Homes, and a detriment and menace to the welfare of the other children. The Homes cannot give mentally defective children the training and control which they re-

quire, and they are therefore growing up to be useless, troublesome and dangerous in the Homes and will be more so later on in the community.

Four hundred or more seriously backward and probably mentally defective children are in their own homes, attending the Public Schools or not attending any school. The parents of many of these children are earnestly asking for help for their children. The children are untaught, unhappy and often cause greatly difficulty at home and at school.

RECOMMENDATIONS.

1. Auxiliary Classes for backward children in the Public Schools.

2. A Register (confidential) of the names and addresses of all Mental Defectives in Toronto.

3. A Farm School (Residential) for the 213 children referred to above, and for others whose parents may apply for admission for them.

4. A By-law if necessary to be submitted to provide for the necessary expenditure for a Farm School.

Signed on behalf of the Committee,

HELEN MACMURCHY, Secretary.

F. OSLER, Chairman.

APPENDIX.

MASSACHUSETTS TRAINING SCHOOL FOR THE FEEBLE-MINDED AT WAVERLEY.

Superintendent, Dr. Walter E. Fernald.

This Institution was visited on Thursday, August 26th, by the following members of the Committee: Dr. Hastings, Medical Health Officer of Toronto; Mr. W. W. Hodgson, Chairman Board of Education; Mrs. Huestis, President of the Local Council of Women, and the Secretary.

The Institution was founded in 1848, and is situated on 160 acres of farm land about 7½ miles from Boston. Eighty per cent. of the Institution population come from this city. This is a contrast to the state of affairs obtaining in New York. That city pays 72 per cent. of the total taxes of New York State and gets only 40 per cent. of the accommodation in State Institutions for the Feeble-minded as compared with the rest of the State, while it cares for nearly all its own feeble-minded in the Institution for that purpose on Randall's Island, which has a population of nearly 2,000.

The Institution at Waverley cares for both sexes, children and adults, of every grade of defect. The total population is now 1,640, including 300 men who are placed on a Farm Colony at Templeton, 70 miles away.

In answer to the question as to whether it was advisable to attempt to care for the higher grades only in an institution, Dr. Fernald replied that outside of certain small private institutions he knew of no institution where this was attempted and that it would not appear to be practicable.

COST OF CONSTRUCTION.

In regard to the cost per bed for construction of a suitable building, the last building at Waverley cost $37,000 and accommodates 105 inmates. The building is red brick and is practically fireproof with slate roof and cement construction in some parts. Three dormitories with 35 in each dormitory are arranged for and the size of these rooms is 30 x 40 feet. This is the standard size of room construction at Waverley and it has been found most satisfactory. The cost of construction may be stated to be from $500 to $5,000 per bed in different institutions for the feeble-minded. However, in some new and simple wooden and concrete buildings at Templeton it has been found possible, in consideration of the special class of inmates cared for there, to house fifteen boys in a cottage which cost $3,500. There are no basements in these buildings and stoves are used in which wood is burned.

COST OF MAINTENANCE.

In regard to the cost of maintenance per patient per year this varies from $147 in Indiana and $150 per year in Kansas to $200 in Waverley and $284 in Vineland. The figures for Waverley and Vineland include food, clothing, heat, light, the care of the property (including repairs), and the salaries of the staff. It is not quite certain that repairs, etc., are included in the Kansas and Indiana figures.

In reply to the question as to the number of these children who can be taught in a class Dr. Fernald said that it was possible in such an Institution as Waverley to teach 35 or 40 in a class, but that in ungraded classes in Public Schools 15 should be the maximum.

STERILIZATION.

Dr. Fernald does not consider this either advisable or possible in the present state of public opinion. He would not be in favor of it at all unless under very exceptional circumstances, and narrated two instances known to himself personally which had convinced him and convinced many others that greater evils might be caused by it than the evils it was intended to avoid.

REGISTER OR CENSUS OF FEEBLE-MINDED PERSONS.

This is an essential part of any organized system of caring for the feeble-minded. Such a Register is now being begun in the City of Boston.

CAN FEEBLE-MINDED PERSONS BE CARED FOR IN THE COMMUNITY.

There have been discharged from Waverley during the last twenty-five years between 800 and 900 of the inmates. Some of these are doing well. Two Field Workers are now engaged in investigating the records of these inmates. Feeble-minded children who have good homes can often be cared for in these homes while they remain children. Old people who are feeble-minded can also be cared for outside of an institution. The years when care is imperative are from eight to ten years to say thirty-five

or forty. The feeble-minded age quickly and senile decay may occur with them at thirty-five or forty years of age.

Dr. Fernald instanced in regard to the subject of follow-up work or after-care work, the work done by Miss Cheney, a Public School teacher in Springfield, Mass. She has been teaching there for seventeen years. No feeble-minded girl who has been under her care in her class has ever become the mother of a child, and she has never had a boy who was in her class arrested. Her methods are her own and her influence and character are such that she is able to do a great work in the community. She maintains a close and friendly relation with the home and the parents of feeble-minded children, and when she sees signs of danger she is able to persuade the parents to send their children to Waverley.

MENTAL STATUS.

One year ago every patient at Waverley was tested as to his or her mental capacity, the Binet tests being largely used. A second test is now being made at the end of the year.

It is found that inmates learn a great deal in the way of being able to work and do things that they have been trained to do. Learning by working and doing things is emphasized in the whole organization of the Institution.

VACATION.

Out of the population of 1,600 inmates about 200 can be allowed to go home on vacation.

HOW TO SECURE THE CONTROL OF THE FEEBLE-MINDED.

It is necessary to popularize the institution so that parents will want to send their children there in order to help the children as well as benefit themselves. In order to do this a campaign of education is most important. The leaders of the community, clergymen, doctors, lawyers, judges and others must be approached. A mailing list with every one of these important citizens on it must be prepared and information must be sent them from time to time.

SPECIAL CLASSES.

These are clearing houses or stepping stones to the institutions. Children should not leave these classes until the age of sixteen or seventeen.

WHO MAKES THE DIAGNOSIS?

This is a medical matter. No Binet Tests or other tests in the hands of an unqualified persons can suffice. Experience and thorough training along with medical knowledge is required. Not infrequently persons are sent to Waverley who are found not to be feeble-minded at all and are therefore not admitted.

There is an Out-Patient Clinic at Waverley. The staff are the examiners. About 600 or 700 persons are examined there every year. This year the number will probably reach 800. The examinations are made by the Superintendent, Dr. Fernald, five assistant physicians and one psychologist. There are also five grade teachers on the staff at Waverley and about fifteen other teachers. The Psychopathic Clinic in Boston also conducts such examinations.

Better instruction should be given to medical students in all questions relating to medical defect. In the last twenty-five years no student has left the medical schools in Boston without having some instruction in this subject.

As an example of those who are not mentally defective at all and who are referred to the clinic, Dr. Fernald mentioned the case of a girl of eighteen living on a lonely farm with an old couple who insisted on sending her to her little room upstairs, in which there was nothing but a bed, a table and a chair, at 6.45 every evening while they talked downstairs. She wanted to stay down, but they would not allow it. She had bought some Paris Green and they feared she intended to poison them. Dr. Fernald was very much interested in the girl; and arranged to send her a travelling library and to give her many things that she ought to have had and had been deprived of. She returned after a month to the Clinic and a very great improvement was found in her.

CLASSIFICATION.

Boys and girls must be kept entirely separate; even at seven or eight years of age in the Kindergarten they ought to be separate. This can easily be secured in a properly organized institution.

ESCAPES.

Escapes occur not infrequently. Dr. Fernald says that it would be a great mistake to have the rigid precautions which would make escape impossible in an institution for the feeble-minded. Inmates who escape are always brought back within a very short time.

DINING-ROOM.

Each cottage has its own dining-room holding about 100. There are ten tables with ten at each table. According to a carefully planned schedule the food is taken from a central kitchen to these dining rooms in little wagons lined with tin. It is the experience of Dr. Fernald that the quantity of food necessary for 100 patients placed in this receptacle keeps itself warm, that is, it retains its own heat sufficiently. These receptacles are lined with tin and closely covered.

NUMBER ON STAFF.

This, including officers, nurses, attendants, foremen and forewomen, engineers, etc., is 256 to a population of 1,640, or one to five or six inmates. Each cottage has one House Mother and five assistants—3 nurses 1 night superintendent, 1 relief officer, total 6. At eight o'clock every evening every one then on duty goes off and a new staff comes on for the night. Every part of the institution is under the care of one or other of the medical officers. This has been found to be the greatest possible comfort and has worked very satisfactorily. The doctor decides how long each girl or boy shall stay in a certain shop or workroom or school room and what change of work or rest is required.

LAUNDRY.

The laundry is supplied with simple and effective equipment, and there were automatic stops and other safety devices.

Every cottage has a playground adjoining it and every patient lives out of doors, summer and winter, as much as possible.

There are four residences on the grounds for officers, nurses and attendants. The aim of the management is to have young and vigorous people to do the work. They are supposed to be pensioned at sixty years of age. The great majority of nurses and attendants are women.

The two members of the staff who have charge of the sports and recreations of the children are very important officers. There is a gymnasium, but the chief end of this work is to keep the children in the open air. Thus, they are all taught games by the Recreation Mistress or Master, and in the winter tobogganing, skating and all other winter sports are arranged for. There is a concrete area for games outside each cottage. There is only one building where the windows are guarded by bars.

The area of most of the rooms is 30 x 40 feet. Thirty-five beds can be placed in such a room, and it is also a good size for industrial work.

The girls' orchestra was seen playing. They had twelve different instruments and the work of the orchestra seemed to be excellent.

The Industrial Building was inspected. One important point in this was the very large area of window space. Just as many windows as could be constructed in the wall are used. Rooms are set apart for domestic science, lace-making, sewing, dressmaking, tailoring, weaving, shoemaking, carpentering, printing and a great many other industries. This Institution sells nothing. It uses all it makes. For example, a large quantity of crash is made every year for the towels used in the Institution.

The members of the Committee who had the privilege of visiting the Massachusetts Training School for the Feeble-Minded at Waverley desire to express their sincere thanks to Dr. Fernald for the great courtesy and kindness and the valuable information received from him on this occasion.

TOTAL ROLL FOR THE MONTH——58,377

NOTE:—The new form of Principal's Monthly Report which has just gone into use shows the exact total of attendance and percentage of regularity based thereon. Hitherto the total of days of attendance has been reported according to the standard of the Provincial Department of Education whereby pupils present for half a day were computed as present for the day. The lower record of percentage of regularity for January is due in some measure to this change, and also to the prevalence of illness.

TOTAL ROLL FOR THE MONTH——58,958

NOTE:—The new form of Principal's Monthly Report which has just gone into use shows the exact total of attendance and percentage of regularity based thereon. Hitherto the total of days of attendance has been reported according to the standard of the Provincial Department of Education whereby pupils present for half a day were computed as present for the day. The lower record of percentage of regularity for February is due in some measure to this change.

To the Board of Education:

At a meeting of the above-named Committee, held this day, the following members being present, viz., Messrs. Steele, Brown, Hopkins, Houston, Hunter, McTaggart and Shaw, it was decided to recommend as follows:

PART I.—HIGH SCHOOLS.

TOTAL ROLL FOR THE MONTH——58,876

NOTE:—The new form of Principal's Monthly Report which has just gone into use shows the exact total of attendance and percentage of regularity based thereon. Hitherto the total of days of attendance has been reported according to the standard of the Provincial Department of Education whereby pupils present for half a day were computed as present for the day. The lower record of percentage of regularity for March is due in some measure to this change.

22. That the High Park Forest School be opened in June.

23. Your Committee reports that the Card Index System as a substitute for the General Register has been tried as an experiment during the past few months in Brown, Dovercourt, Earl Grey, Fern Avenue, Givins Street, Wellesley and Winchester Street Schools. As to convenience of the system, six schools report in favor and one against. As to saving time, four report in favor and three against. As to value for purpose of a permanent record, five report in favor and two against. From other standpoints, opinion is evenly divided. The estimated cost of introducing this system into all the schools at one time would be about $2,000.00 with an additional outlay of $250.00 for new cards. If the card index system is adopted, it should be introduced at the beginning of the school year rather than at the beginning of the calendar year. An outlay of $800 would be required for this purpose for the fall term. If the system is introduced at all, it should be introduced in all the schools at once.

24. Your Committee reports as follows on Dr. Brown's motion inquiring as to the supply of maps in the public schools:

Following is a summary of statistics showing the relative number of maps in the Public Schools of the Province and Toronto:

	No. of Maps.	No. of Maps per Teacher.
Rural schools	5,792	9.4
Villages	516	4.0
Towns	1,238	2.6
Cities	2,348	1.9
Toronto	1,854	1.6

From this statement it may be seen that the supply of maps in the Public Schools of Toronto is sixteen per cent. less than that of the average city of the Province, and that the supply of maps in the cities and the towns is apparently much smaller than that of the villages and the rural schools.

Some allowance should be made for the fact that in the large city schools the same set of maps may conveniently be used in more than one class. There are limits, however, to this convenience.

On a modern estimate, the Second, Third, Fourth and Fifth Forms of the Public Schools of the City should have a supply of not less than 2,500 of the standard geographical maps. Of the 1,854 maps at present in the schools it is safe to say that one-third of these are out of date. In other words, to fairly meet the present requirements of the schools, the supply of maps should be doubled in the near future.

25. That tenders for fuel for the Public Schools, in accordance with specifications prepared by the Clerk of Supplies, be accepted as follows:

REPORT OF INSPECTORS RE PRIMARY KINDERGARTEN CLASSES.

Toronto, September 20th, 1916.

To the Board of Education:

The Board of Inspectors begs to report on Dr. Noble's motion: "That the Board of Inspectors report to this Board at its next regular meeting what steps are necessary in order to introduce Primary-Kindergarten classes in all the Public Schools," as follows:

GENERAL.

As to the steps to be taken—the Board of Education has power to order the general introduction of Kindergarten-Primary forms instead of or in addition to the Kindergarten.

The following information is pertinent to the question:

SYNOPSIS OF REGULATIONS.

Pupils between the ages of 4 and 7 may be admitted to the Kindergarten Form.

Pupils between the ages of 5 and 7 may be admitted to Kindergarten Primary Forms.

Boards may establish either a Kindergarten or a Kindergarten Primary Form or both, or they may omit both Forms.

A teacher of a Kindergarten Primary Form must hold a Kindergarten Primary Certificate.

The accommodations for Kindergarten Primary classes are about the same as prescribed for Kindergartens, except that the room need not be so large. A room about 30 by 30 or 27 by 33 is advised. Tables and chairs with rubber tipped legs are to be used instead of desks.

The course of work is a combination of that of Kindergarten and Primary Forms.

A teacher holding a Kindergarten Primary certificate is legally qualified to teach pupils from beginning of Kindergarten to Entrance to Second Form.

The equipment is in part that required for Kindergarten. Considerable additional equipment is also to be used in teaching Reading, Spelling, Language, Number Work and Elementary Art and Manual Work.

The full equipment prescribed by the Regulations for a Kindergarten Primary class of 35 pupils will cost $175. But the essentials of the work could be well carried on with an initial outlay of not more than $50 per class, with such sums for annual supplies as are now required for the Kindergarten Forms

NOTES.

A considerable number of the teachers of Toronto, both Kindergarten and Grade teachers, are already qualified for Kindergarten Primary Work.

This work has been introduced into several of the Pubilc Schools in the past year with no radical disturbance of existing conditions.

Pupils are now being promoted from the Kindergarten at six years of age .

R. H. COWLEY,
Chief Inspector.

MANAGEMENT REPORT NO. 19.

Wednesday, September 27th, 1916.

To the Board of Education:

At a meeting of the above-named Committee, held this day, the following members being present, viz., Messrs. Steele, Fairbairn, Hopkins, Houston and Hunter, it was decided to recommend as follows:

PART I.—HIGH SCHOOLS.

1. That the request of the Children's Aid Society for permission to take up a collection in the schools on November 9th and 10th in aid of that Institution be granted.

2. That the request of the Edith Cavell Monument Memorial Committee to be allowed to take up a collection in the schools on October 3rd, towards a fund for the erection in Toronto of a monument to the memory of Nurse Edith Cavell, be granted.

3. That the request of the Toronto High School Athletic Association, that the various High Schools be allowed to hold a single session from 9 a.m. to 1 p.m. on four Fridays on which the rugby games are to be played, commencing October 6th, be granted.

6. That the scholarships offered to the High Schools by the Board of Education, each being free tuition for one year, be continued; that the aggregate number of scholarships (at present 135) be divided amongst the nine High Schools in proportion to the attendance of each, and that they be awarded in each school approximately in the following ratio:

Three scholarships to pupils passing from Form II. to Form III.
Three scholarships to pupils passing from Form III. to Form IV.
Three scholarships to pupils passing from Form IV. to Form V.
Two scholarships to pupils spending a second year in Form V.

These scholarships will be awarded only in cases where the conduct of the pupil has been satisfactory and the character of the work done throughout the year has been especially high.

The awards are to be based upon the results of examinations held from time to time throughout the school year to determine the relative standing of the pupils in their respective classes.

A scholarship winner whose conduct or the character of whose work during any term are not satisfactory to the Principal of the school may be deprived of the benefit of the scholarship for the following term.

In case a scholarship in a certain Form should not be awarded it may be awarded to a deserving pupil in a Lower Form, but unawarded scholarships in Lower Forms may not be awarded in Higher Forms.
